

EmOtox Body Balance (EBB)

## Live Sensitivity Free In 10 Visits or Less!

*"Going through the EmOtox process has been life changing. I feel like I have discovered what alignment truly feels like and I am living again!"*  
-Jen S. (Sarasota, FL)

### Accurate Personalized Therapies

**Using data from your SpectraVision scan**, your Bionetic Practitioner will assess blockages to the free flow of energy in your body that are associated with a variety of different substances – from dairy and grains; to dust, pollen, molds and many more.

Then, he or she will build a personalized therapy, introduced by non-invasive low level laser therapy, for specific acupuncture points on the body. Supportive products, designed specifically for you, may also be recommended.

The EBB Protocol, combined with SpectraVision™ technology, makes desensitization easy, fast and thorough. By supporting your body to create new and different associations with each substance to which you are sensitive, SpectraVision's delivery of powerful homeopathic frequencies literally resets your body's response to these substances in real-time!

Patient places HID in open palm and closes fingers around HID touching brass plate.

## Freedom in 10 Sessions or Less

**During each session, a new set of imbalances will reveal themselves** to be addressed and resolved. You may picture peeling layers from an artichoke to get to the heart; lessening toxic burdens to reveal an optimal state of health is very much the same. Each EmOtox session lessens and/or resolves another layer of obstacles to wellness, revealing a more energetic, happy and healthy you – and freeing life-force energy to resolve deeper imbalances and symptoms. EBB has organized a specialized sequence for addressing most common stressors; the full 10-visit protocol is recommended.

## Quick, Easy, and Non-invasive

Because SpectraVision is frequency-based therapy, there is very little you need to do to prepare. Just drink water and be adequately hydrated. Then simply watch, as your relationship with old stressors shifts, in the coming days to weeks and you feel more energetic, aware and content.

## EBB Also Helps with Microbiome Body Balance

**As researchers learn more about the microbes that keep us healthy**, we are coming to understand how subtle imbalances in our microbial populations can also cause disease—and how restoring the balance may lead to cures. New Human offers the individualized assessment that gives practitioners the best possible approach to rebalancing this very important system of the body and create greater success with desensitization.

***"... didn't know that my son had food allergies and many food sensitivities. When he first started his treatments, I didn't really notice anything different (he slept a lot more). Then one day, it was like a light went off! He started laughing all the time, cracking jokes, being his old self. I had my son back!!! It is amazing how these treatments can change your life. He is a happy, confident young man now!"***  
-Leah (Elk River, MN)
